I am a tech enthusiast with a passion for coding and building applications. My career began in technical support, where I honed my communication and problem-solving skills with major consumer brands, sparking a love for problem-solving. This drive led me to earn a degree in Information Technology, opening the door to web development as a coding instructor at a bootcamp, where I taught aspiring developers and deepened my programming knowledge. These experiences prepared me for my current role as a front-end developer, where I blend creativity and technical expertise to create responsive web applications that deliver engaging user experiences across platforms.

Skills

- **Programming Languages:** JavaScript ES5 & ES6, PHP, Python, Solidity, C#
- **Frameworks and Libraries:** ReactJS, Express, Node.JS, Socket.io, CodeIgniter, jQuery, Django, MudBlazor, Tailwind
- **Web Design:** HTML, CSS, LESS, SASS, Bootstrap, RWD, UX technology
- **Version Control System:** Git
- **Databases:** MySQL, MongoDB
- **Communication skills:** Advanced

Trainings & Education

Village 88

(January 2023 - April 2023)

- Graduated from Village 88 Training Program which taught me industry-relevant software development skills

Keywords Studios Manila

(March 2022 - July 2022)

- Rendered 486 hours of Internship focusing in Asset management and admin personnel assistance.

Bulacan State University

(A.Y. 2018 - A.Y. 2023)

- Finished Bachelor of Science in Information Technology

Professional Experience

Frontend Developer at SAIB Inc

(March 2024 - Present)

- Developed responsive web applications using Blazor and MudBlazor, and styled components with Tailwind CSS, enhancing the user experience and design consistency across platforms.
- Collaborated effectively with fellow frontend and backend developers to optimize application performance through code reviews, and drove continuous improvement by fostering knowledge sharing sessions.
- Engaged directly with clients and their designers to create layouts that were both visually appealing and efficient from a coding perspective.

Coding Instructor | Instructor trainer at OneCodeCamp

(May 2023 - March 2024)

- Achieved recognition as the Top Instructor Performer for two consecutive months (September - October)
- Skillfully managed three Bootcamp classes, fostering an inclusive learning environment for both Foreign and Local students
- Spearheaded the development and maintenance of Teaching Curriculum and Materials, employing technical writing and video creation to enhance educational resource
- Handled Internal hiring team to train candidates for a Coding instructor role

Technical Support Representative

(October 2010 - November 2016)

- Developed excellent communication skills by resolving customer issues for major SaaS companies and consumer brands. Demonstrated the ability to think on my feet and work under pressure to find resolutions that benefited both clients and the company, ensuring customer satisfaction and retention.
